

■ Weight Detection Device

■ Weight Detection Device

▶ Description

Product development For the purpose to determine the weight of an extinguishing agent in digestion vessel. When out of range of the weight values set by the leakage or release delivery an abnormal signal to the controller.

▶ Features

- A long period of time designed to measure the exact weight is possible (to minimize measurement error for a long time the cylinder weight)
- First and second weight value can be set (leakage, discharge)
- Monitoring of Sensor Malfunction

| SPECIFICATION | | | | |
|-----------------------------|---|---------------------------------|-------------|-------------|
| Model | | NWD-1GG0141 | NWD-2GG0451 | NWD-3GG0721 |
| Size (mm) | W | 220 | 290 | 400 |
| | D | 200 | 290 | 200 |
| | H | 42 | 42 | 42 |
| Coverage | | 10 ~ 180kg | | |
| The Recommended Temperature | | 10°C ~ 35°C | | |
| Power | | DC 24V | | |
| Consumption Current | | Standby-120mA / Operation-150mA | | |
